

# i221169 TBW Tasks lecture 3

Date @August 27, 2024

## Task 1:

Numerous problems with flexographic printing need consideration. Very short runs of 1000 or less can be excessively costly. In addition, dot gain presents another potential problem. Flexography can also struggle with small print and reverse print.

The page, entitled "Features," lists all of the Netmeeting software's features down the center. Each feature includes a brief discussion to inform the user of its purpose. Users can find detailed information on each feature by clicking on the icon.

## Task 2:

### Exercise: Parallel Structure

Google is my favourite search engine because it is fast, provides relevant data and produces accurate information.

## Task 3:

**PRACTICE: Eliminate there are, or any related form, from the following sentences.**

Information retrieval in the data processing is slow and inefficient.

I need to learn some XML code.

The Web relies on business to provide product information.

Modifying packaging methods is necessary to reduce the release of contaminants into the environment.

## **Task 4:**

**EXERCISE: Correct the nominalizations in the following sentences.**

Click OK to insert the image into the document.

You needed to specify the file as a Word document to convert it from text to Word.

Manipulating the layout to transform it into film is the process of color separation.

## **Task 5:**

### **Practice: Clarity**

Numerical control exists in two forms, CNC (Computer Numerical Control) and DNC (Distributed Numerical Control).

Online registration is frustrating. It should speed up the process, but the on-screen instructions are unclear, with messages like "illegal command." Retracing steps to a previous screen is also difficult.

This project will be presented in a web format, with links to resource sites and related topics.

Many websites allow viewers to purchase new and used equipment directly from the site.
